---

Hi Todd and Ann,

Thanks for the opportunity to attend the meeting last week. I know there wasn't a lot of time for Q&A, but I did cover everything I planned to regarding EPA's current thoughts on the SMS revisions. If you have follow up questions, please don't hesitate to contact me.

Thanks,

Matthew Szelag

---

Hi All,

Thanks for coming down (and over) to the CTWQP meeting at NWIFC next week. Attached is the agenda. If you have any questions please do not hesitate to contact me.

Your pieces will start at approximately 11 AM or shortly thereafter. Our expectations are that the sediment and human health criteria pieces will take approximately 30 minutes each. Matt, I am guessing that the EPA piece will only need about 15 minutes. Unfortunately, we have a pretty full agenda and so we can't afford too much more than that.

It is also our expectation that this day will serve as purely a technical exchange of information. We do not intend this day to serve as official or formal comment/participation in the current rule making process.

As a recap to my previous message, and to help guide you in your updates, below are some general points that we are interested learning about:

- Martha - status of rule promulgation, will there be a response to comments document, and summary of expected responses to tribal comments.
- Matt - status of EPA review of their decision to review and approve the SMS, important EPA considerations/concerns with the process, criteria for decision making, and expected outcomes.

- Melissa - update on the Ecology stakeholder process and future direction(s), intersection of other stakeholder forums and the rule development, timelines for completion, status of rule language development (including the implementation rule)

Again, thanks for help. See you soon.

cheers,  
Todd
